

# Dietetics Expert Witnesses

Dietitians are highly skilled practitioners who undertake specialist scientific training concerning food, nutrition and health. At Bush & Co our dietetic experts provide an independent opinion about food related problems/ disease impacted by clinical negligence or personal injury.

Bush & Co's dietetic expert can be instructed on liability reports however, they are predominantly instructed on quantum reports in high value cases to comment on nutritional issues and or nutritional support.

In particular they are specialist in diabetes, cardiology, nutrition support (including artificial nutrition and pressure ulcer management), cancer and palliative care.

They provide an opinion on condition and prognosis (in relation to their scope of professional practice), evaluate relevant treatments, recommend nutrition choices, equipment and related therapies.

## Rebecca McManamon | Dietician

Rebecca is highly knowledgeable in dietetics with extensive experience in acute and community settings in the NHS.

Rebecca has specialised in a variety of clinical areas in the NHS, such as diabetes, cardiology, nutrition support (including artificial nutrition and pressure ulcer management), cancer and palliative care, whilst maintaining general dietetic skills and knowledge, Rebecca is well placed to provide a balanced assessment using her diverse and in-depth experience.
