

Expert Witness Services

Established over 35 years ago, our expert witness service is made up of over 90 clinical professionals across the UK, giving you confidence that we can find you the perfect match for your expert witness quantum and liability reports.

Our expert witness reports are written by experienced and credible associate expert witnesses who deliver objective opinion and high quality reports that regularly exceed expectations. They work clinically in a number of professions including nursing and midwifery, speech and language therapy, physiotherapy and occupational therapy and are experienced in catastrophic injury including Acquired Brain Injury, Spinal Cord Injury, amputation, birth injury and complex orthopaedic injuries.

Assessments

Expert witness assessments can be undertaken in person, via video call or over the telephone, depending on the circumstances of the case and your preference as the instructing party. Where face-to-face assessment is not available we offer video conferencing with a face-to-face follow up to provide a comprehensive report once it is appropriate to do so. If your client does not have access to technology, we can provide secure tablets for assessment.

Quality Assurance

To uphold our reputation for providing exceptional reports, all pieces of written work undertaken by our associate expert witnesses must pass through a robust quality assurance process to guarantee they are court compliant and to ensure they accurately respond to the instructions provided by the referring parties.

This process is managed by a dedicated Quality Assurance team which includes a lawyer and is supported by our Reports Production team; ensuring the expert witnesses' opinion remains unchanged and is not influenced.

Throughout Bush & Co we operate an ethical walls system to remove conflict of interest and ensure privacy.

Our associates

We pride ourselves in making training and guidance available to all associate expert witnesses who work with Bush & Co. This ensures our UK-wide network is fully compliant with their duty as experts to instructing parties and to the court and remain up-to-date on industry trends and legal changes.

our training includes topics to ensure our associate expert witnesses comply with law and the applicable procedures that apply to their work, how to write court compliant reports, giving oral evidence and professional conduct.
